

Improve collaboration and optimize brainstorming sessions

Have you run into this situation during a brainstorming session?

With the inability to consolidate ideas and content from various employee laptops onto a shared digital display, the design team struggles to collaborate and share accurate meeting notes. A lack of real-time collaboration technology also leads to frustration for remote participants who have trouble effectively sharing ideas with the onsite team.

Improve collaboration between onsite and offsite employees

Ricoh's interactive flat panel displays (IFPDs) make sharing innovative ideas easier. Now design team members in onsite meeting rooms can collaborate more effectively with both each other and remote participants. Plus, Ricoh's IFPDs come in a variety of sizes, offer mounting for conference room walls or stands for use in open huddle areas, and provide access to Reactiv Suite presentation solutions — offering more brainstorming flexibility.

With Reactiv STAGE, meeting facilitators can seamlessly toggle between various file types — such as videos, images, web pages and

Microsoft® programs. Plus, it's easy to:

- Arrange visual elements on the IFPD to compare multiple ideas.
- Annotate documents directly on the display.
- Save the annotated files for easy post-brainstorm follow-ups with team members.

Reactiv SCRIBBLE empowers members of the design team to collaborate directly on the IFPD simultaneously by making annotations and taking notes to expand upon their ideas. After the meeting, the facilitator can quickly share these collaboration files digitally with all members.

Improve collaboration and optimize brainstorming sessions

Improve collaboration between onsite and offsite employees

Plus, Ricoh's Unified Communication System (UCS) Advanced Web Based Videoconferencing solution enables remote employees to connect to every brainstorming session by video, so they can present and discuss their ideas in real time. UCS Advanced supports a variety of devices — including laptops, tablets, smartphones and traditional videoconferencing equipment in remote locations. Ricoh's IFPDs can also integrate with other videoconferencing solutions — such as Skype® for Business.

Make sharing ideas easier by empowering your design team to:

- Enable participants to collaborate on the display simultaneously.
- View documents side by side for easy comparison.
- Share ideas between onsite and remote participants in real time.
- Spend less time on post-meeting follow-ups.
- Use a variety of file types — including images, videos, PDFs and more.

Hardware and solutions

- Ricoh IFPDs (available in sizes 32", 55", 65", 75" and 86") with Windows® 10 controller
- Ricoh's UCS Advanced Web Based Video Conferencing solution
- Optional stand or mounting for Ricoh IFPDs
- Reactiv Suite interactive presentation software — including Reactiv STAGE and Reactiv SCRIBBLE
