Optimize presentations with smart collaboration technology

Have you experienced the following issues during team meetings?

While presenting monthly updates, a leader and team lose valuable time at the start of each meeting when trying to get the presentation solutions and conferencing technology to work properly. The leader also struggles to connect and communicate with remote employees in real time — making it more difficult to engage these team members.

Enhance presentations with smart collaboration technology

With Ricoh's interactive flat panel displays (IFPDs), leaders can start meetings quickly, helping them to focus on key content for the bulk of each meeting. Plus, Ricoh IFPDs support Reactiv Suite solutions for access to presentation and conferencing applications — letting leaders easily share innovative ideas with both onsite and offsite employees simultaneously.

Reactiv STAGE enables leaders to seamlessly toggle between various file types — such as videos, images, web pages and Microsoft®

programs — helping to save time before each meeting by eliminating the need to consolidate all content into a single presentation program. Plus, during meetings, it's easy to:

- Arrange visual elements on the IFPD to compare multiple ideas.
- Annotate documents directly on the display.
- Save the annotated files for easy post-meeting follow-ups with team members.

Leaders can also exit Reactiv Suite to access other solutions or visit websites during the meeting with ease via the IFPD's Windows® 10 controller.

In addition, Ricoh's Unified Communication System (UCS) Advanced Web Based Videoconferencing solution lets remote and traveling employees connect to every meeting by video, so they can easily engage with the content in real time — helping them to feel more like they're in the room and part of the team. UCS Advanced supports a variety of devices, including laptops, tablets, smartphones and traditional videoconferencing equipment located in remote locations. Ricoh's IFPDs can also integrate with other videoconferencing solutions — such as Skype® for Business.

Simplify how you communicate information during presentations with:

- Intuitive collaboration technology
- The ability to reduce meeting delays due to technical issues
- Easy navigation between files
- Real-time communication with onsite and offsite employees
- Less time spent on post-meeting follow-ups

Hardware and solutions

- Ricoh IFPDs (available in sizes 32", 55", 65", 75" and 86") with Windows® 10 controller
- Ricoh's UCS Advanced Web Based Video Conferencing solution
- Reactiv Suite with Reactiv STAGE interactive presentation software
