

Improve employee engagement during trainings

Does the following training scenario sound familiar?

A corporate trainer spends many hours creating a PowerPoint® deck for a corporate training event with both onsite and offsite employees — taking the extra effort to help ensure employees are engaged. However, during training, many employees multitask, and it's a struggle to keep them focused on the content.

Increase employee engagement with interactive collaboration technology

Ricoh's interactive flat panel displays (IFPDs) — can help trainers maintain employee engagement by offering more interactive corporate training experiences. Plus, Ricoh IFPDs support Reactiv Suite presentation solutions that offer more versatility during presentations.

With Reactiv STAGE, corporate trainers can seamlessly toggle between various file types — such as videos, images, web pages, documents located in customer relationship management (CRM) systems and Microsoft® programs — saving preparation time by eliminating the need to consolidate all content into a single PowerPoint® presentation.

Plus, during meetings, it's easy to:

- Arrange multiple visual elements on the display to compare ideas side by side.
- Annotate documents directly on the screen for emphasis.
- Zoom in and slow down video to help highlight key concepts.

Reactiv SCRIBBLE empowers corporate trainers to take notes on the display during training sessions. Plus, it's easy to save and digitally share notes and annotated documents with employees for quick and easy post-training follow-ups. During each session, trainers can exit the Reactiv Suite to access other solutions or visit websites on the display with the IFPD's Windows® 10 controller.

Improve employee engagement during trainings

In addition, Ricoh's Unified Communication System (UCS) Advanced Web Based Videoconferencing solution lets remote employees connect to every training session by video, so they can engage with the content in real time — enabling face-to-face interactions that help trainers to ensure offsite participants are paying attention. UCS Advanced supports a variety of devices, including laptops, tablets, smartphones and traditional videoconferencing equipment located in remote locations. Ricoh's IFPDs can also integrate with other videoconferencing solutions — such as Skype® for Business.

Prepare for and facilitate corporate training events more efficiently with:

- Less preparation time
- Engaging training sessions enriched with multimedia content
- Easy navigation between files
- Real-time communication with onsite and offsite employees
- Intuitive collaboration technology

Hardware and solutions

- Ricoh IFPDs (available in sizes 32", 55", 65", 75" and 86") with Windows® 10 controller
- Ricoh's UCS Advanced Web Based Video Conferencing solution
- Reactiv Suite interactive presentation software — including Reactiv STAGE and Reactiv SCRIBBLE
