

IFPD Use Cases

(Interactive Flat Panel Display)

RICOH
imagine. change.

- **Classroom Collaboration**

- Use to enhance classroom teaching, collaboration, team activities, and board work
- Use IFPD as main board in classroom for presentation and collaboration
- Enable visually or physically challenged students to better participate in class

- **Classroom Display**

- Use IFPD as main display in classroom - show movies, videos, web content, etc.

- **Distance Learning**

- Fully integrated AV room for in person and remote student learning and interaction

- **Educational Software**

- Education software can be bundled with Ricoh IFPD to provide complete solution for teachers
- Leverage the open Windows™ 10 controller with any 3rd party app including Google G-Suite, Oktopus, Ximbus, and more

- **Digital Signage**

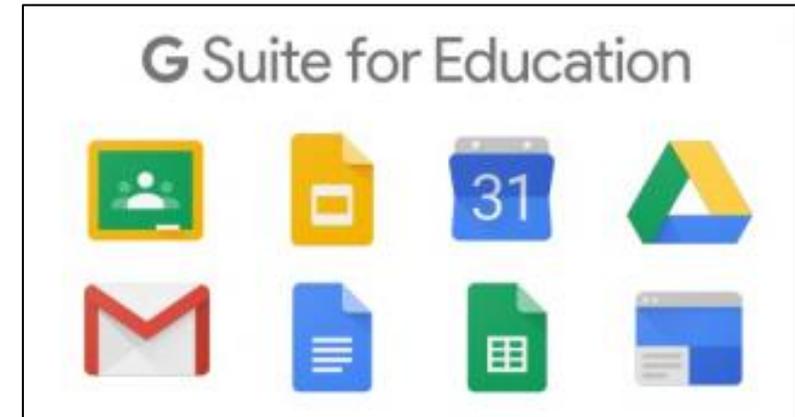

- Distribute announcements, reminders, alerts and physical directions, even without words

- **School Security**

- Use in conjunction with other school IFPDs to improve communication and security
- Enable internal or external response teams to quickly and collectively review protocols, plans, security cameras, and more

- **School Sports**

- Allow coaches or entire teams to review game video, analyze performance, develop strategies, and enable “telestration”

- **Classroom Collaboration**

- Use to teach and fully collaborate with students and their computers, the Internet, and multimedia
- Use IFPD as work platform for a teacher that is duplicated and enlarged by a projector to fit large lecture halls.
- Encourage team teaching, discussion, or debate with input from one or many locations

- **Classroom Display**

- Use IFPD as main display in classroom - show movies, videos, web content, technical software, CAD files, etc.

- **Virtual Job & Admission Interviews**

- Conduct interviews for incoming students and prospective employees

- **Distance Learning**

- Enable distance (or multi-campus) learning or training in an interactive fashion
- Enable remote interviewing of prospective students, guest lecturers, or staff members by teams especially with UCS-A

- **Education Software**

- Education software, like Blackboard, can be bundled to provide a complete platform for teachers
- Leverage the open Windows™ 10 controller with any 3rd party app including Google G-Suite, Office 365, AutoCAD, and more

- **Digital Signage**

- Distribute announcements, reminders, alerts, and physical directions, even without words

- **Campus Security**

- Use in conjunction with other school IFPDs to improve communication and security across campuses
- Enable internal or external response teams to quickly and collectively review protocols, plans, security cameras, and more

- **School Sports**

- Allow coaches or entire teams to review game video, analyze performance, develop strategies and enable “telestration”

- **Increase Productivity of Conference Rooms**

- Use as a full multimedia display without concerns for ambient light
- Use as a safe, secure, editable, and shareable whiteboard for brain storming in one or many locations
- Use to mark up documents collaboratively while reducing risk of erasure, theft, or uncertainty
- Use to enable travelling, remote, or mobile staff to fully participate in meetings with just a PC or tablet
- Leverage the open Windows™ 10 controller to share technical software like Hoylu Sketch and Flow

- **Training Meetings**

- Enable better on-boarding and training of personnel whether near or far
- Better enable interviews of remote or potential staff especially with UCS-A

- **Security**

- Use with other IFPDs to improve communication and security on one or many campuses
- Enable internal or external response teams to quickly and collectively review protocols, plans, security cameras, & more

- **Digital Signage**

- Distribute announcements, reminders, alerts, and physical directions even without words
- Use for real-time scoreboard for project management or for production, customer service, or sales contests

**Turn Right for
Conference**

- **Increase Productivity of Conference Rooms**

- Use as a full multimedia display without concerns for ambient light
- Use as a safe, secure, editable, and shareable whiteboard for brain storming in one or many locations
- Use to mark up documents collaboratively while reducing risk of erasure, theft, or uncertainty
- Use to enable travelling, remote, or mobile staff to fully participate in meetings with just a PC or tablet
- Leverage the open Windows™ 10 controller to share medical software

- **Distance Learning**

- Enable a facility to provide training to other facilities or obtain the same

- **Case Management**

- Enable a team to collectively track and annotate a patient's progress, X-rays, or charting

- **Team Status Display**

- Nursing station display that lists patients by room

- **Distance Consulting**

- Enable a remote specialist to confer with local staff or patients

- **Digital Signage**

- Distribute announcements, reminders, alerts, and physical directions even without words
- Use for real-time scoreboard for project management or for production or customer service
- Interactive information panel to provide care giver contact information or other relevant data

- **Increase the Value of Rented Conference Rooms**

- Use as a full multimedia display without concerns for ambient light
- Use as a safe, secure, editable, and shareable whiteboard for brain storming in one or many locations
- Use to mark up documents collaboratively while reducing risk of erasure, theft, or uncertainty
- Use to enable travelling, remote, or mobile staff to fully participate in meetings with just a PC or tablet
- Upgrade events to include video conferencing with UCS-A
- Minimize training with the familiar Windows™ 10 interface

- **Digital Signage**

- Distribute announcements, reminders, alerts, and physical directions even without words
- Use for real-time scoreboard for events
- Interactive information panel to provide visitor contact information or other relevant data

- **Digital Kiosk**

- Touchscreen with custom user interface for client interaction
